Apache Spark Engineers

Australia / Singapore

➢ Use and expand your Spark skills
➢ Drive business benefits using Spark as the enabler
➢ Generous Base + Super + Unlimited Career Potential

We are currently witnessing the increasing use and adoption of Apache Spark technology to achieve high speed data and analytics decisioning, across all industry segments. This increasing demand for this cloud based distributed general-purpose cluster-computing framework is expected to be the key growth driving factor for the analytics market.

On behalf of one of our clients, a leading player in the cloud-based data and analytics field, we are seeking an overview of the current Apache Spark talent pool with a view to commencing a series of placements.

These roles will showcase your comprehensive Spark skills and abilities to showcase how the technology answers real world data business problems. We seek individuals who have an affinity with Data, Analytics, Big Data and AI and can articulate these technologies been part of the overall digital transformation discussion. You shall have a proven ability to facilitate engagement dialogue at the C-level if required, and establish complex value propositions quickly and simply.

The successful individual would need to have and draw upon a broad repertoire of skills, knowledge and attributes including:

➢ 8+ years IT technical experience
➢ Strong experience selling complex Enterprise software solutions
➢ Good knowledge of enterprise software architecture and technologies
➢ Possess the intelligence and aptitude to position the benefits of Spark based solutions
➢ Organized and self-motivated while working independently and in team to set and achieve goals
➢ High energy with ability to excel in an entrepreneurial, fast moving
➢ Solid computer knowledge including proficiency with software applications
➢ Demonstrable technical depth with the ability to effectively communicate with both technical and non-technical stake holders
