

RPA Developer

Australia

- Strong RPA Skills and Knowledge
- Multiple & Diverse Projects
- Competitive Base + Super + Excellent Career Potential

The ongoing use and adoption of Robotic Process Automation (RPA) technology by organisations provides significant opportunities for cost saving, process improvement and organisational agility across all industry segments. This adoption drives an increasing demand for experienced and capable RPA developers to provide expertise and skills to these vendors and organisations.

On behalf of one of our clients, a leading player in the RPA world, we are seeking the services of a solid RPA Developer for their Australian operation, based in either Sydney or Melbourne.

This role will showcase your comprehensive RPA knowledge and skills to showcase how the technology answers real world data business problems. We seek individuals who have an affinity with Data, Analytics, Big Data and AI and can articulate these technologies been part of the overall digital transformation discussion. You shall have a proven ability to be client facing and assisting with architecting and implementing their Automation agenda to establish complex value propositions quickly and simply.

The successful individual would need to have and draw upon a broad repertoire of skills, knowledge and attributes including:

- 8+ years IT technical experience
- Strong technical experience in any RPA product with AA and Blue Prism valued higher
- Solid knowledge of enterprise software architecture and technologies
- Product Pre or Post sales experience
- IT Professional Service experience would be desirable
- Possess the intelligence and aptitude to position the benefits of RPA based solutions
- Organized and self-motivated while working independently and in team to set and achieve goals
- High energy with ability to excel in a fast-paced environment
- Excellent communications skills
- Demonstrable technical depth with the ability to effectively communicate with both technical and non-technical stake holders
